**DETAILED ACTION**

1. A request for continued examination (RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed 8/09/04 in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's amendments and remarks filed 6/10/04 have been entered.
2. Claims 21 and 22 are pending and being acted upon.
3. In view of Applicant's amendment and remarks the previous rejections under 35 U.S.C. 102 have been withdrawn. In particular, the new limitation that the invention comprise a T cell component separated from blood has necessitated the withdrawal of the rejections.
4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:  
A person shall be entitled to a patent unless --  
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
5. Claims 21 and 22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Foster et al. (1996).  
  
Foster et al. teaches a population of mammalian (human) T cells (peripheral blood mononuclear cells) essentially free of stem cells, separated from human blood by leukopheresis, having been subjected *in vitro* to oxidative stress (UVB irradiation) (see particularly page 56, Materials and Methods).  
  
The reference clearly anticipates the claimed invention.
6. Claim 21 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yaron et al. (1996).

Yaron et al. teaches a population of mammalian (human) T cells (peripheral blood mononuclear cells) essentially free of stem cells, having been subjected *in vitro* to oxidative stress (UVB irradiation) (see particularly page 259, Materials and Methods).

Application No: 09/853,755      3  
Art Unit: 1644

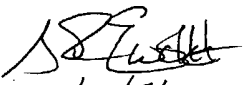

The reference clearly anticipates the claimed invention.

7. No claim is allowed.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (571) 272-0843. The examiner can normally be reached Monday through Thursday from 7:30 am to 5:30 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841.
